GLADIOLI

GROWN BY

W. D. HATHAWAY

77 Shawmut Ave.

NEW BEDFORD, MASS.

The Gladioli is fast becoming one of the best for cut flowers, lasting as they do a week or more if cut the morning after the first bud opens. Do not despise a young bulb of medium size, as they will give you the best flower spike where an old, large bulb will throw up two or more inferior spikes.

In planting spade the ground up a foot or 18 inches, mixing well with the soil some well rotted manure, plant the bulbs 4 or 5 inches deep, 3 or 4 inches apart, cover 2 or 3 inches with earth, scatter on some pulverized bone meal and cover up level. When they are 6 to 8 inches tall keep them well watered.

While every care is exercised at digging, planting and packing that none should be mixed, no guarantee is given other than to replace any stock that may prove not true to name. All prices are subject to stock being unsold. All prices in this list are for bulbs prepaid to your address. All orders must be accompanied by remittance.
